

SELF-PAY PATHOLOGY CONSENT

Your skin lesion(s), biopsied today, is being sent for diagnosis to a dermatopathologist. Since you are "self-pay", you will be responsible for the fees related to interpreting your specimen.

The basic fee for interpretation of a biopsy is \$75.00 per specimen. Occasionally, special stains are required in order to obtain an accurate diagnosis. These stains are ordered by the dermatopathologist only when needed, and there is no way for us to predict when they will be needed. If special stains are deemed necessary to obtain an accurate diagnosis, you will receive a separate and additional bill for those stains. You will be responsible for payment of those special stains.

Please know that our first priority is providing an accurate diagnosis. We appreciate your trust in us and allowing us to help you keep your skin healthy.

Sincerely,

Pinnacle Dermatology

I have read the above and understand that I will be financially responsible for fees necessary to obtain an accurate diagnosis of the lesion(s) which has been removed.
